BBVA Insurance Payment

Overview

An insurance Claim is queued for the patient in the Cloud9 website. The Insurance company sends the payment to BBVA, then it process the payment and submit the EDI file to the Cloud9 Receive Location that is configured in the BizTalk Server. If the file is processed successfully, then the payment is displayed inside the Patient Ledger view.

Process diagram

Process details

1. **Cloud9 employee** enqueue an Insurance Claim from the Website
2. **Insurance** send the payment to BBVA.
3. **BBVA** process the payment.
4. **BBVA** generate an 835 X12 EDI file.
5. **BBVA** send the file to the SFTP site (BizTalk Receive Location).
6. **BizTalk Pipeline** archive the file to have a backup available.
7. **BizTalk Pipeline** parse the file into XML format.
8. **BizTalk Pipeline** debatch each Payment Transaction (ST/SE sections) into individual 835 messages.
9. **BizTalk Pipeline** save each 835 message into the MessageBox database.
10. **BizTalk Orchestrator** read the 835 message from the MessageBox database.
11. **BizTalk Orchestrator** get the Practice Name from the Receive Location folder.

12. **BizTalk Orchestrator** get the database connection string for the Practice Name identified.
13. **BizTalk Orchestrator** map 835 message (Payment) into the ClaimPaymentBatch canonical schema.
14. **BizTalk Orchestrator** debatch the ClaimPaymentBatch into individual ClaimPayment messages.
15. **BizTalk Orchestrator** map the ClaimPayment into the Post835InsuranceTransaction schema.
16. **BizTalk Orchestrator** call the AddImportLog Stored Procedure (Send Port)
    a. If the payment is processed successfully a new record is added into the ImportLog table.
    b. If there are errors during processing a new record is added into the ImportLog table.
17. **BizTalk Orchestrator** map 835 message (Payment) into the AdjClaimPaymentBatch canonical schema.
18. **BizTalk Orchestrator** debatch the AdjClaimPaymentBatch into individual AdjClaimPayment messages.
19. **BizTalk Orchestrator** map the AdjClaimPayment into the AdjPost835InsuranceTransaction schema.
20. **BizTalk Orchestrator** call the AddImportLog Stored Procedure (Send Port)
    a. If the payment is processed successfully a new record is added into the ImportLog table.
    b. If there are errors during processing a new record is added into the ImportLog table.
21. **Cloud9 Site** display the patient payment into the Patient Ledger view.

BizTalk elements

BizTalk element	Name
Type	INBOUND
Schema	BBVA_X12_00501_835.xsd
Parties	• BBVA • SMILE DOCTORS
Receive Location	RL_BBVA835_Insurance_<PRACTICE>_FILE
Receive Port	RP_BBVA835_Insurance
Send Port	• SP_BizTalkCloud9Common_WCF • Process_BBVA_835Insurance_Post835TransactionPort • Process_BBVA_835Insurance_AddImportLogPort
Orchestrator	Process_BBVA_835Insurance

Mapping

These are the most important elements that are mapped from the **835 X12 EDI** format into the **ClaimPayment canonical** format.

EDI Position	EDI Element	ClaimPayment Element
CLP04	Claim Payment Amount	TotalActualProviderPaymentAmount
BPR07	Sender DFI Identification Number	SenderDFIIdentifier
CLP01	Claim Submiter Identifier	PatientControlNumber
NM109	Identification Code	PatientIdentifier

These are the most important elements that are mapped from the **ClaimPayment** format into the **Post835PatientTransaction** format.

EDI Position	ClaimPayment Element	Post835PatientTransaction Element
CLP04	TotalActualProviderPaymentAmount * -1	transAmount
CLP04	TotalActualProviderPaymentAmount * -1	transDueNowAmount
CLP04	TotalActualProviderPaymentAmount * -1	transTotalDueAmount
BPR07	SenderDFIIdentifier	transRouting
CLP01	PatientControlNumber	adaClaimNumber
NM109	PatientIdentifier	pipPolicyNumber

Testing

Claim Insurance

1. Open Cloud9 Website
2. Enqueue an Insurance Claim

Check the Practice database configuration

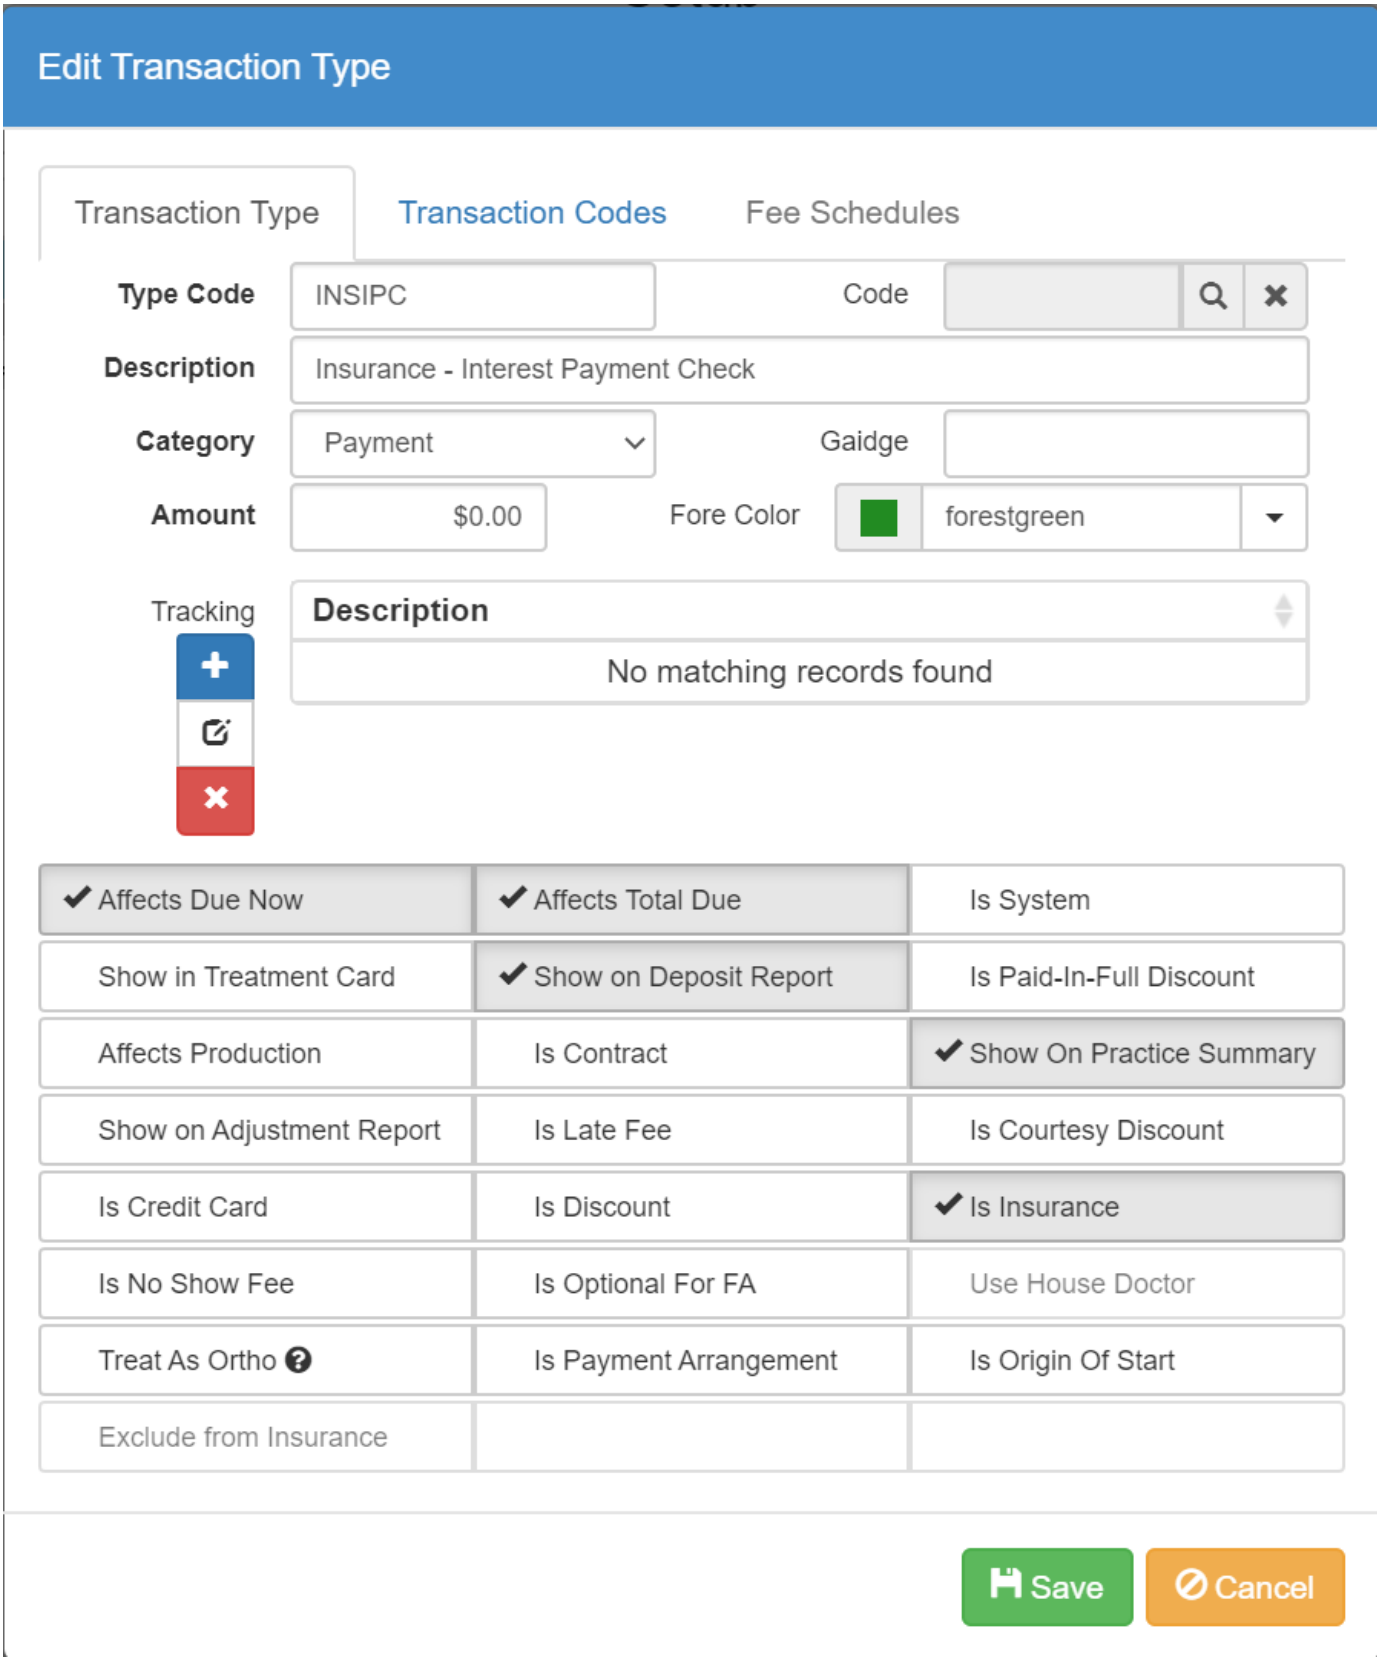

1. **GULFCOAST** will be used as the **Practice Name** for the testing, but it can be changed for any other
2. Open **SSMS** and connect to the **BizTalkCloud9Common** database
3. Run the **GetPracticeConfig.sql** query in **SSMS**
4. The result will display the **Practice** database that is configured.

Check the Receive Location configuration

1. Open the **BizTalk Server Administration** console
2. Navigate to **Cloud.EDI** > **Receive Locations**
3. Find the Receive Location Name for RL_BBVA835_Insurance_**<PRACTICE-NAME>**_**FILE**
4. The **URI** column represents the drop location for the EDI files

Check if the Insurance Payment Type is enabled for the Practice

1. Open **SSMS** and connect to the **Practice** database
2. Run the **GetInsurancePaymentType** query in SSMS
3. The result should display a record with the **INSURANCE** Payment Type information
4. If no results are displayed for both statements, then create new Transaction Types from the Cloud9 Setup section.

Prepare the EDI file

1. Open the Sample EDI File in a text editor
2. Open **SSMS** and connect to the **Practice** database
3. Run the **GetInfoToReplaceOn835File.sql** query in SSMS

4. Replace the results inside the EDI file
5. Copy the EDI file into the Receive Location folder
