BBVA Patient Payment

Overview

The Patient sends the payment check to the Health Care Provider Lockbox, then BBVA process the payment and submit the EDI file to the Cloud9 Receive Location that is configured in the BizTalk Server. If the file is processed successfully, then the payment is displayed inside the Patient Ledger view.

Process diagram

Process details

1. **Patient** send the payment check to the Health Care provider Lockbox.
2. **BBVA** collect the payment check from the Lockbox and process the payment.
3. **BBVA** generate an 835 X12 EDI file.
4. **BBVA** send the file to the SFTP site (BizTalk Receive Location).
5. **BizTalk Pipeline** archive the file to have a backup available.
6. **BizTalk Pipeline** parse the file into XML format.
7. **BizTalk Pipeline** debatch each Payment Transaction (ST/SE sections) into individual 835 messages.
8. **BizTalk Pipeline** save each 835 message into the MessageBox database.
9. **BizTalk Orchestrator** read the 835 message from the MessageBox database.
10. **BizTalk Orchestrator** get the Practice Name from the Receive Location folder.
11. **BizTalk Orchestrator** get the database connection string for the Practice Name identified.
12. **BizTalk Orchestrator** map 835 message (Payment) into the ClaimPaymentBatch canonical schema.

13. **BizTalk Orchestrator** debatch the ClaimPaymentBatch into individual ClaimPayment messages.
14. **BizTalk Orchestrator** map the ClaimPayment into the Post835PatientTransaction schema.
15. **BizTalk Orchestrator** call the Post835PatientTransaction Stored Procedure (Send Port).
    a. If matches are found the Payment is added into the Transaction table.
    b. If matches are not found the Payment is added into the UnmappedTransaction table.
16. **BizTalk Orchestrator** call the AddImportLog Stored Procedure (Send Port)
    a. If the payment is processed succesfully a new record is added into the ImportLog table.
    b. If there are errors during processing a new record is added into the ImportLog table.
17. **Cloud9 Site** display the patient payment into the Patient Ledger view.

BizTalk elements

BizTalk element	Name
Type	INBOUND
Schema	BBVA_X12_00501_835.xsd
Parties	• BBVANAV • SMILE DOCTORS
Messages	
Receive Location	• RL_BBVA835_Patient_<PRACTICE>_FILE • RL_BBVA835_Patient_<PRACTICE>_SFTP
Receive Port	RP_BBVA835_Patient
Send Port	• (*) SP_BizTalkCloud9Common_WCF • (**) Process_BBVA_835Patient_Post835TransactionPort • Process_BBVA_835Patient_AddImportLogPort
Orchestrator	Process_BBVA_835Patient

Mapping

These are the most important elements that are mapped from the **835 X12 EDI** format into the **ClaimPayment canonical** format.

EDI Position	EDI Element	ClaimPayment Element
BPR04	Payment Mehod Code	PaymentMethodCode
BPR07	Sender DFI Identification Number	SenderDFIIdentifier
BPR16	Payment Effective Date	CheckIssueorEFTEffectiveDate
TRN02	Reference Identification	CheckorEFTTraceNumber
CLP01	Claim Submiter Identifier	PatientControlNumber
CLP04	Claim Payment Amount	TotalActualProviderPaymentAmount
CLP07	Reference Identification	PayerClaimControlNumber
NM109	Identification Code	PatientIdentifier
NM109	Identification Code	SubscriberIdentifier

These are the most important elements that are mapped from the **ClaimPayment** format into the **Post835PatientTransaction** format.

EDI Position	ClaimPayment Element	Post835PatientTransaction Element
BPR16	CheckIssueorEFTEffectiveDate	transDateTime
	Today's Date/Time	transDateTimePosted
	"N"	transStatus
	New GUID	transGUID

NM109	PatientIdentifier	patGUID
	New GUID	transDebitGroup
	New GUID	transCreditGroup
CLP04	TotalActualProviderPaymentAmount * -1	transAmount
	"Check Number: " + CheckorEFTTraceNumber	transNote
	"Check Number: " + CheckorEFTTraceNumber	transReceiptNote
TRN02	CheckorEFTTraceNumber	transReference
CLP04	TotalActualProviderPaymentAmount * -1	transDueNowAmount
CLP04	TotalActualProviderPaymentAmount * -1	transTotalDueAmount
	"0"	transProductionAmount
	"1"	transIsGroup
	"0"	transClaimAmount
TRN02	CheckorEFTTraceNumber	transCheckNumber
BPR07	SenderDFIIdentifier	transRouting
BPR04	PaymentMethodCode	lbcLockboxCode

Testing

Check the Practice database configuration

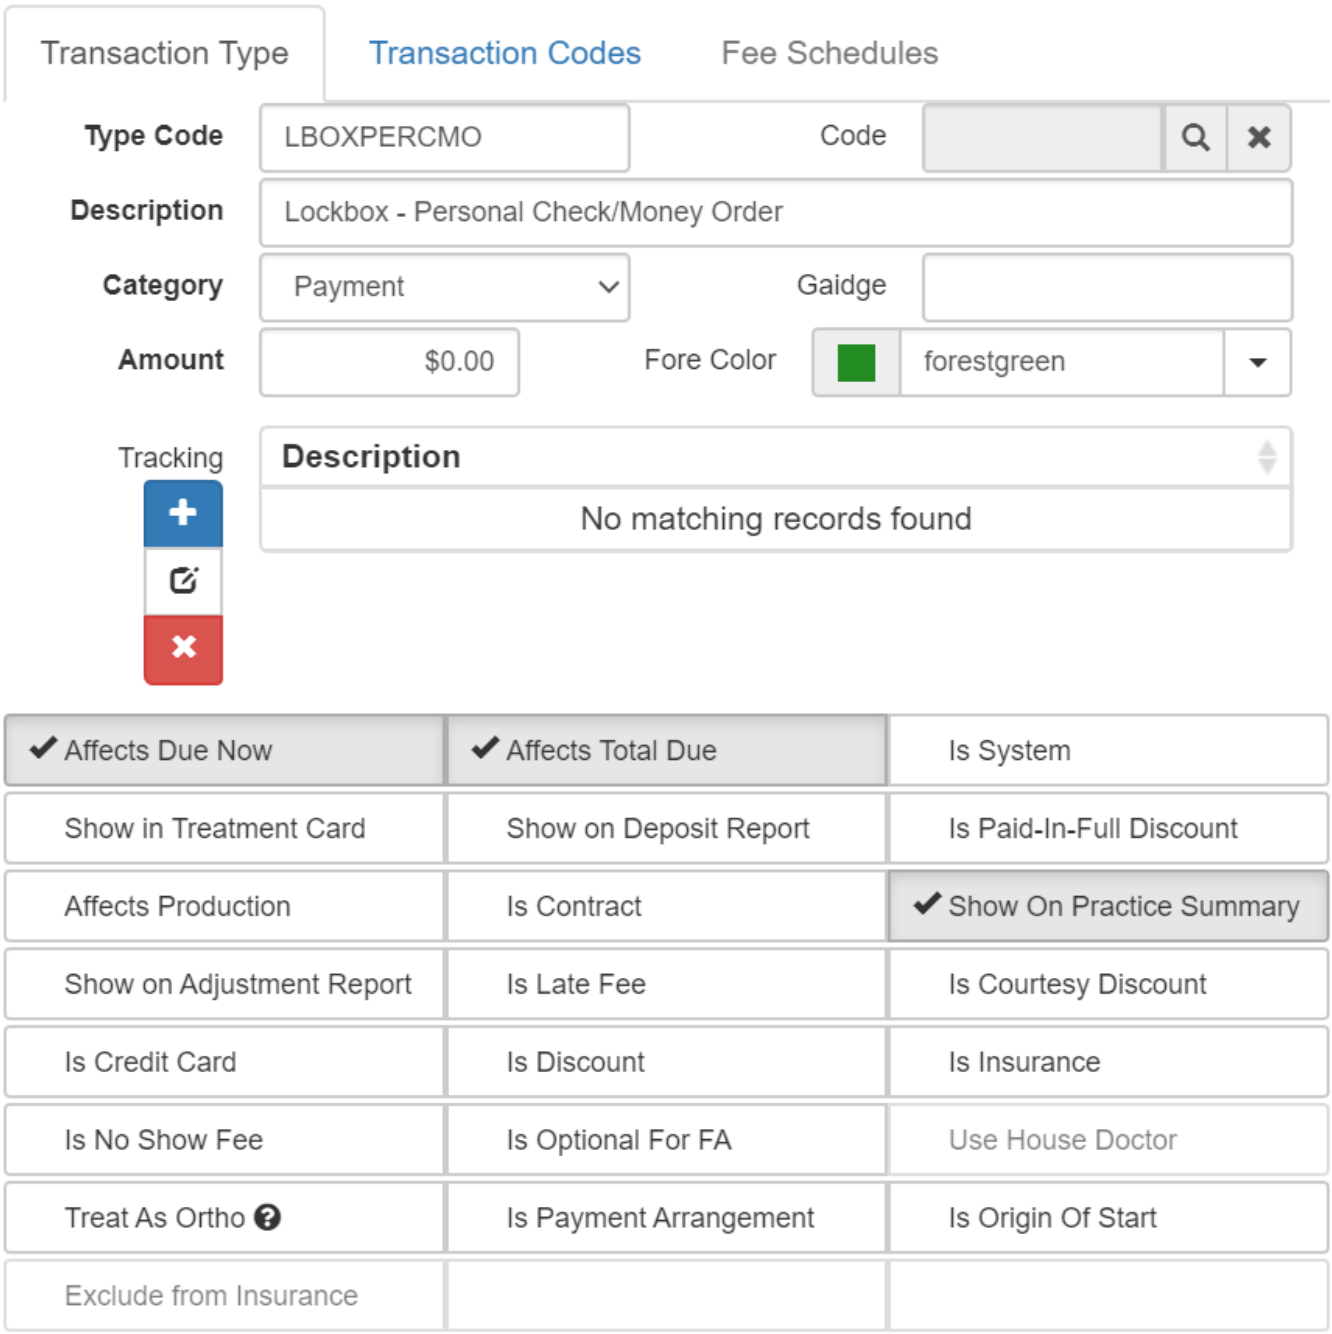

1. **GULFCOAST** will be used as the **Practice Name** for the testing, but it can be changed for any other
2. Open **SSMS** and connect to the **BizTalkCloud9Common** database
3. Run the **GetPracticeConfig.sql** query in **SSMS**
4. The result will display the **Practice** database that is configured.

Check the Receive Location configuration

1. Open the **BizTalk Server Administration** console
2. Navigate to **Cloud.EDI** > **Receive Locations**
3. Find the Receive Location Name for **RL_BBVA835_Patient_<PRACTICE-NAME>_FILE**
4. The **URI** column represents the drop location for the EDI files

Check Lockbox Payment Type is enabled for the Practice

1. Open **SSMS** and connect to the **Practice** database
2. Run the **GetLockboxPaymentType** query in SSMS
3. The result should display a record with the Lockbox Payment Type information
4. If no results are displayed for both statements, then create a new Transaction Type from the Cloud9 Setup section.

Prepare the EDI file

1. Open the Sample EDI File in a text editor
2. Open **SSMS** and connect to the **Practice** database
3. Run the **GetInfoToReplaceOn835File.sql** query in SSMS
4. Replace the results inside the EDI file
5. Copy the EDI file into the Receive Location folder

Validate results

1. Open **SSMS** and connect to the **Practice** database
2. Run the **GetTransactionsPatientPayment.sql** query in SSMS
3. The Payment for the patient should be displayed in the results

Documents, Queries and Resources

Description
835 Patient Payment Lockbox Mapping    This document contains: • 835 X12 EDI file mapping. • ClaimPayment mapping. • Post835PatientTransaction mapping.
835 Patient Payment Lockbox Sample File 
Query to get Practice info Path: $Biztalk\Cloud9.BizTalk.Scripts\IntegrationsCommon\GetPracticeConfig.sql
Query to get Patient Info to replace into the Sample File Path: $Biztalk\Cloud9.BizTalk.Scripts\835BBVAPatientPaymentLockbox\GetInfoToReplaceOn835File.sql
