SD Web Patient Payment

Overview

The Patient make a payment from the Smile Doctors Website, then the EDI file is send to the Cloud9 Receive Location that is configured in the BizTalk Server. If the file is processed successfully, then the payment is displayed inside the Patient Ledger view.

Process diagram

Process details

1. **Patient** make a payment from the Smile Doctors Website.
2. **BizTalk Pipeline** archive the file to have a backup available.
3. **BizTalk Pipeline** parse the file into XML format.
4. **BizTalk Pipeline** debatch each Payment Transaction (ST/SE sections) into individual 835 messages.
5. **BizTalk Pipeline** save each 835 message into the MessageBox database.
6. **BizTalk Orchestrator** read the 835 message from the MessageBox database.
7. **BizTalk Orchestrator** get the Practice Name from the Receive Location folder.
8. **BizTalk Orchestrator** get the database connection string for the Practice Name identified.
9. **BizTalk Orchestrator** map 835 message (Payment) into the ClaimPaymentBatch canonical schema.
10. **BizTalk Orchestrator** debatch the ClaimPaymentBatch into individual ClaimPayment messages.
11. **BizTalk Orchestrator** map the ClaimPayment into the Post835PatientTransaction schema.
12. **BizTalk Orchestrator** call the Post835PatientTransaction Stored Procedure (Send Port).
    a. If matches are found the Payment is added into the Transaction table.

    b. If matches are not found the Payment is added into the UnmappedTransaction table.
13. **BizTalk Orchestrator** call the AddImportLog Stored Procedure (Send Port)
    a. If the payment is processed succesfully a new record is added into the ImportLog table.
    b. If there are errors during processing a new record is added into the ImportLog table.
14. **Cloud9 Site** display the patient payment into the Patient Ledger view.

BizTalk elements

BizTalk element	Name
Type	INBOUND
Schema	SD_X12_00501_835.xsd
Parties	• SMILE DOCTORS • CLOUD9
Messages	
Receive Location	RL_SD_835_WEB_<PRACTICE>_FILE
Receive Port	RP_SD835_Patient
Send Port	• SP_BizTalkCloud9Common_WCF • Process_SD_835Patient_Post835TransactionPort • Process_SD_835Patient_AddImportLogPort
Orchestrator	Process_SD_835Patient.odx

Mapping

These are the most important elements that are mapped from the **835 X12 EDI** format into the **ClaimPayment canonical** format.

EDI Position	EDI Element	ClaimPayment Element
BPR04	Payment Mehod Code	PaymentMethodCode
BPR07	Sender DFI Identification Number	SenderDFIIdentifier
BPR16	Payment Effective Date	CheckDate
TRN02	Reference Identification	CheckorEFTTraceNumber
CLP01	Claim Submiter Identifier	PatientControlNumber
CLP04	Claim Payment Amount	TotalActualProviderPaymentAmount
CLP07	Reference Identification	PayerClaimControlNumber
NM109	Identification Code	PatientIdentifier
NM109	Identification Code	SubscriberIdentifier
NM109	Identification Code	pipGUID
REF02	Reference Identification	MaskedCreditCardNumber
REF02	Reference Identification	MaskedBankAccountNumber
REF02	Reference Identification	OpenEdgeCheckNumber
REF02	Reference Identification	MaskedRoutingNumber

These are the most important elements that are mapped from the **ClaimPayment** format into the **Post835PatientTransaction** format.

EDI Position	ClaimPayment Element	Post835PatientTransaction Element
BPR16	CheckIssueorEFTEffectiveDate	transDateTime
NM109	PatientIdentifier	patGUID

CLP04	TotalActualProviderPaymentAmount * -1	transAmount
REF02	MaskedCreditCardNumber	transReference
REF02	MaskedBankAccountNumber	transReference
CLP04	TotalActualProviderPaymentAmount * -1	transDueNowAmount
CLP04	TotalActualProviderPaymentAmount * -1	transTotalDueAmount
NM109	SubscriberIdentifier	ppGUID
REF02	OpenEdgeCheckNumber	transCheckNumber
REF02	MaskedRoutingNumber	transRouting
BPR04	PaymentMethodCode	lbcLockboxCode

There are some special conditions that are applied in the mapping. To check these conditions, download the mapping spreadsheet from the Documents section below.

Testing

Check the Practice database configuration

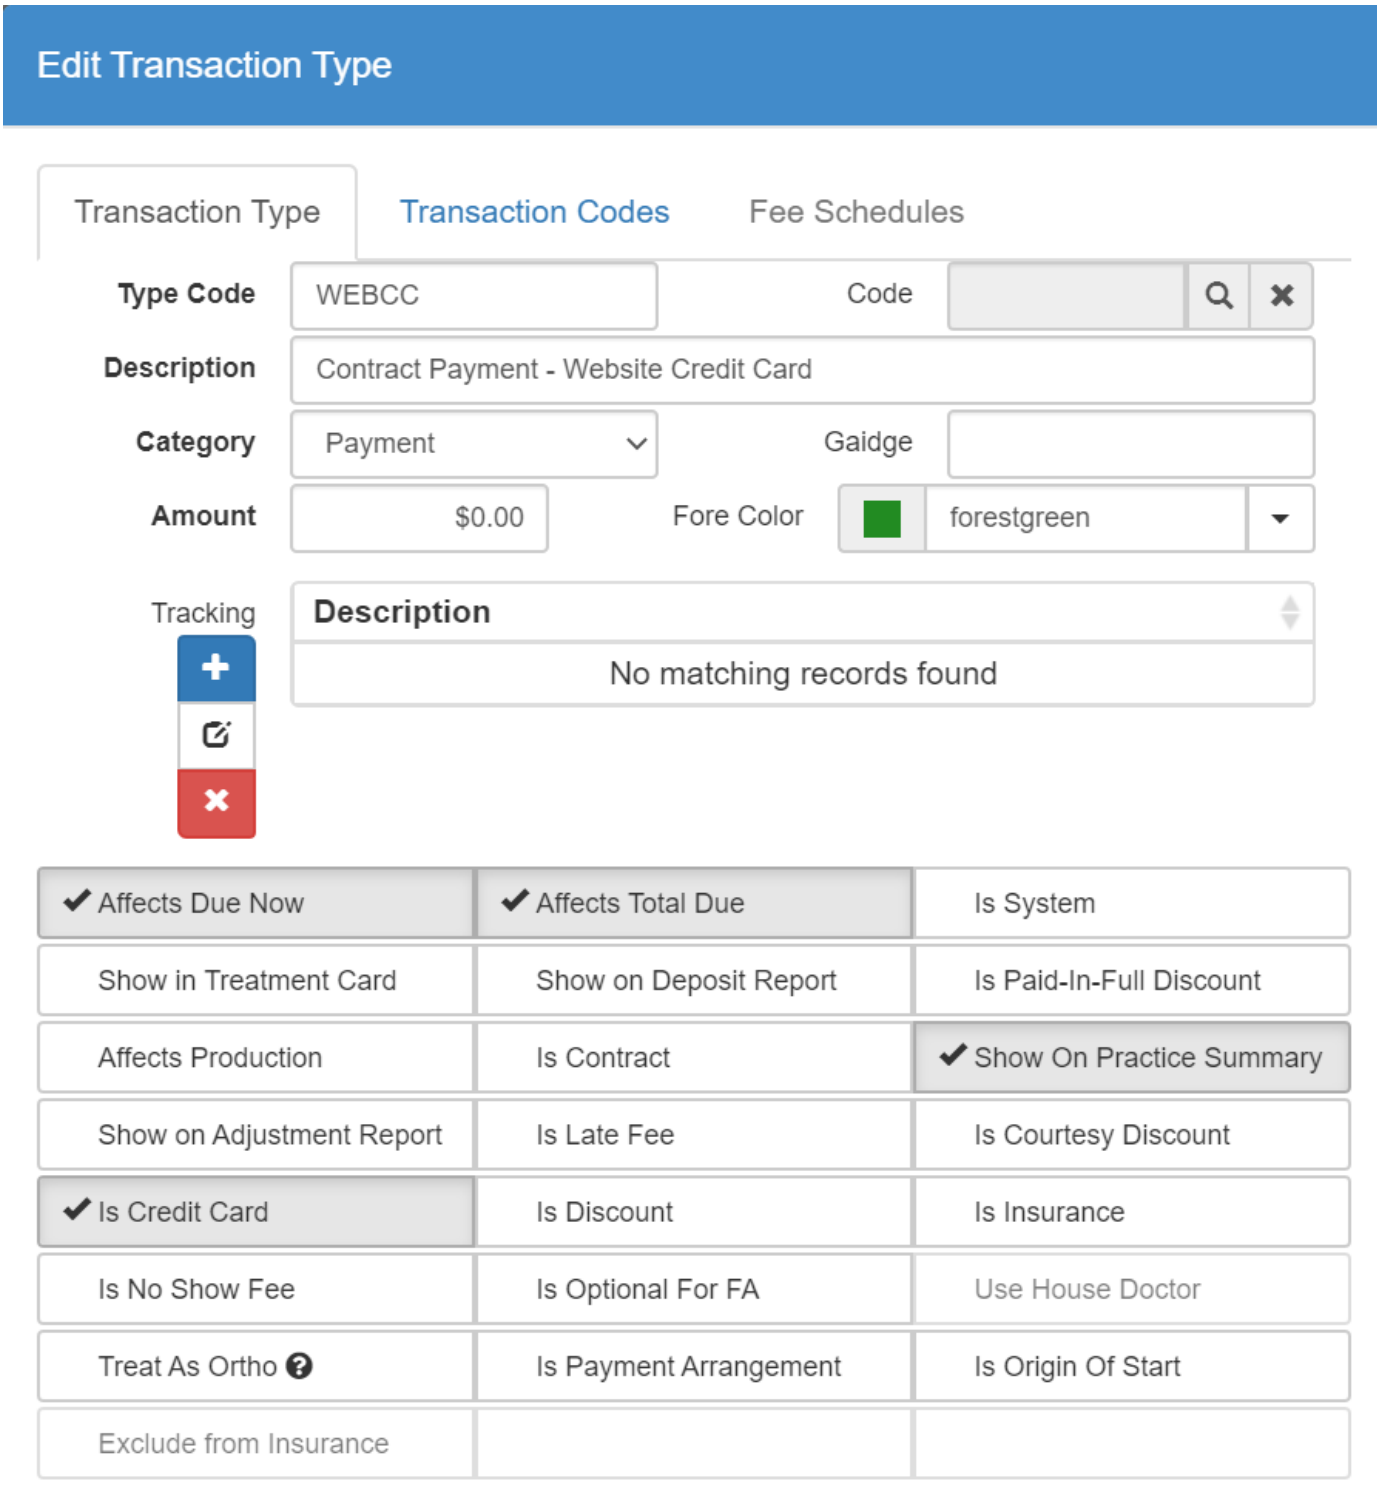

1. **ATLANTAMETRO** will be used as the **Practice Name** for the testing, but it can be changed for any other
2. Open **SSMS** and connect to the **BizTalkCloud9Common** database
3. Run the **GetPracticeConfig.sql** query in **SSMS**
4. The result will display the **Practice** database that is configured.

Check the Receive Location configuration

1. Open the **BizTalk Server Administration** console
2. Navigate to **Cloud.EDI** > **Receive Locations**
3. Find the Receive Location Name for **RL_SD_835_WEB_<PRACTICE-NAME>_FILE**
4. The **URI** column represents the drop location for the EDI files

Check if the SD Web Patient Payment Type is enabled for the Practice

1. Open **SSMS** and connect to the **Practice** database
2. Run the **GetWebPatientPaymentType** query in SSMS
3. The result should display a record with the **WEB** Payment Type information
4. If no results are displayed for both statements, then create a new Transaction Type from the Cloud9 Setup section.

Prepare the EDI file

1. Open the Sample EDI File in a text editor
2. Open **SSMS** and connect to the **Practice** database
3. Run the **GetInfoToReplaceOn835File.sql** query in SSMS
4. Replace the results inside the EDI file
5. Copy the EDI file into the Receive Location folder

Validate results

1. Open **SSMS** and connect to the **Practice** database

2. Run the **GetTransactionsPatientPayment.sql** query in SSMS
3. The Payment for the patient should be displayed in the results

Documents, Queries and Resources

File
